## CAREER OBJECTIVE

---

Highly motivated Web Developer with experience in building and maintaining web applications. Seeking to join a dynamic team where I can utilize my skills to help drive the success of the organization.

## PROJECTS

---

### TinDog Web Application

#### Creator, Designer, Developer

📅 January 2024 - February 2024

- <https://qwicch.github.io/TinDog/>
- Used: HTML, CSS, Bootstrap.
- Built responsive, accessible, and dynamic web pages to enable all users can navigate site.
- Used Bootstrap to create aesthetic graphs and charts to display consensus data results.

### Clear-100k-Data Project

#### Creator, Developer

📅 November 2023 - December 2023

- <https://github.com/Qwicch/Clear-100k-Data>
- Used: Java
- Reads .txt file that contains a list of 100,000 words in order of their usage in English writing samples.
- My Project eliminates comment lines, duplicates, converts to lowercase, order of the words remain same.
- Allows to search words by the word itself or the index of popularity.
- Saves Cleared Data in a new .txt File for the further usage.

### Movelt Web Application

#### Creator, Designer, Developer

📅 January 2024 - February 2024

- <https://qwicch.github.io/Movelt/>
- Used: HTML, CSS, Bootstrap.
- Built responsive, accessible, and dynamic web application for a small moving company.
